CYVO

About CYVO

A majority of people believe their online and offline activities are being monitored and tracked by governments and companies. So prevalent is this view that six-in-ten adults say they do not think it is possible to go through daily life without data being collected about them. Fraudsters will always discover sophisticated ways to steal assets from unsuspecting customers; therefore it is up to us ourselves from these illicit attacks. CYVO is developing a series of revolutionary solutions to protect users privacy and prevent data theft through the use of post-quantum encryption & blockchain based cryptographic solutions.

ECOSYSTEM

OUR PRODUCTS

ULTRA-SECURE OS

An Operating System (OS) in today's world is the gateway through which we perform interactions with our digital devices to access the online virtual world. With full disk encryption, Encrypted VPN, Multi-tiered access control with self-destruct mechanism CYVO's OS protects you from security loopholes and exploitations.

CYVO BROWSER

One of the safest browsers in the market - as a free, open-source web browser, it ensures that privacy is key. The browser automatically blocks online advertisements, website trackers and protects from browser fingerprinting putting you in sole control of your data.

CYVO DIGITAL ASSET WALLET

Built to be future ready and secure on the Ethereum Multichain blockchain. Packed to the gills with LUKS, AES 256 and Post Quantum encryption, the CYVO wallet features a simple and intuitive user experience with, multi factor authentication, utilization of TOR networks and even resistance to pattern sniffing intrusion tactics.

CYVO DECENTRALIZED STORAGE

Ultra-secure, fail proof, unhackable and untraceable storage designed to keep you in control of your data. Blockchain-enabled using cyber security frameworks to safeguard your data and accessible only to you

CYBER SECURITY
STATISTICS 2022

$10.5 TRILLION
Cybercrime cost by 2025

$56 BILLION
Identity fraud losses in 2022

287 DAYS
Time for security teams to identify and contain a data breach

33 BILLION
Records stolen by cybercriminals by 2023, an increase of 175% from 2018.
